

GREYWATER recycles 100,000 ltr of wastewater per day at SGDPL

GREYWATER, a Mumbai based specialised technology company that pioneers the next generation products for sewage and wastewater treatment announced the handover of a 100 KLD GREWA-R based STP at the gems factory of Shairu Gems Diamonds Pvt. Ltd., Surat (Gujarat). SGDPL is amongst the first facility of its kind in the world to be awarded IGBC's LEED India Gold certificate.

"We are extremely proud to announce that our prestigious client Shairu Gems has been awarded the IGBC's LEED India certification. The facility is equipped with our next generation GREWA-R STP that treats and recycles 100,000 L of wastewater per day. The treated water is used for HVAC makeup, landscaping and common area cleaning. We feel extremely proud to be associated with such a socially responsible and progressive client and it gives us immense satisfaction to have enabled Shairu Gems in their efforts to be environment friendly," said Arun Dubey, Director - Greywater.

GREYWATER's STP plant has been running over a year now at our facility in Surat. The treated water from the plant is used for various non-potable applications within the compound. The GREWA-R STP is an integral part of our energy efficient and environmentally sustainable design. The recently awarded LEED certification is a proof of GREYWATER and Shairu Gem's efforts to conserve our environment," said Atul Mehta, Technical Head - SGDPL.

GREYWATER is the only company in India

to provide truly packaged and next generation STP products. In last three years the company has enabled several prestigious clients such as Leighton Welspun, Mahalaxmi Developers, Dell, Unitech and others to make their projects water sustainable. GREWA-R comes in with a unique nutrient removal feature which not only helps in effectively processing nutrient rich wastewater from commercial complexes such as Shairu Gem's factory but also elongate the storage life of recycled water.

GREYWATER is a specialised technology company that pioneers the next generation products for sewage, wastewater and effluent treatment.

Funded by Nexus Venture Partners, GREYWATER's compact plug-n-play products are being used in Hospitality, Commercial, Hospitals,

SEZ, IT parks, Residential and Industrial sectors. The products significantly reduce space footprint by 30 per cent to 70 per cent and energy requirements by 40 per cent to 50 per cent compared to conventional plants. These plants are designed and built to handle variable loads and require minimal manual intervention. Greywater's clients include prestigious corporates such as Dahej SEZ, Mahindra Holidays, Oberoi Realty, Gemco Power, Unitech, Leighton Welspun. The Greywater team comprises experienced professionals, with over 108 years of combined industry experience.
